

DIAMOND DRILLING RIG & STAND

Diamond Drilling Rig and Stand

Suitable for:

- Plumbers and electricians requirements
- Builders work - general purpose
- Bathroom and kitchen installations

DIAMOND DRILLING RIG & STAND

Diamond drilling is a quiet, non-percussive way of forming holes and openings. The method is free of bursting or spoiling and requires little or no reinstatement work.

Water and dust control attachments can be used where clean environments are being worked in.

Both wet and dry drilling techniques provide precise holes in base materials such as natural or re-constituted stone, mass concrete, reinforced concrete and blockwork.

Suction Vacuum Pads and Water Bottle

TECHNICAL DATA

| | | | |
|----------------|-----------------------|------------------|-----------------------|
| Drill Model | DK12 | Drill Size | 6.0 mm - 152 mm |
| Weight | 6.0 kg | Vacuum Pump | 180mm x 180mm x 180mm |
| Power | 1.50kw | Small Vacuum Pad | 260mm x 290mm |
| Spindle Thread | 1/2 inch BSP or 1"1/4 | Large vacuum Pad | 400mm x 420mm |
